AGENDA

Content Analysis Defined and Trends

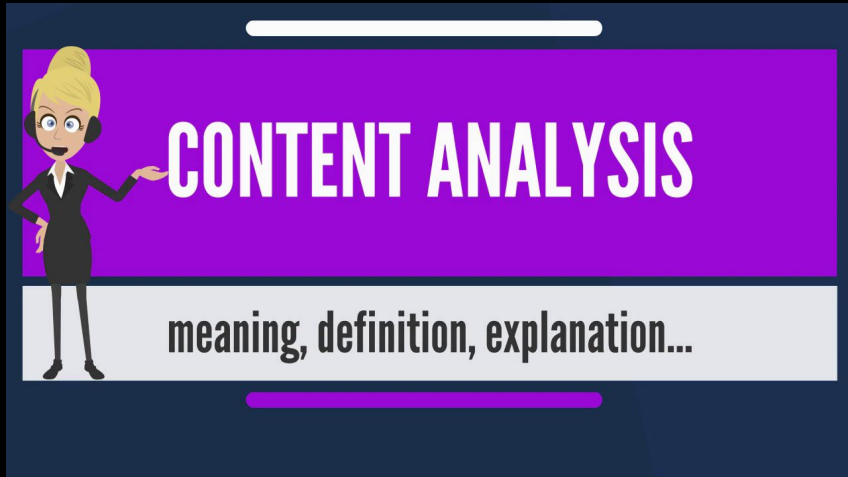

Data Types for Content Analysis

A Toolkit for Research Using Content Analysis

CONTENT ANALYSIS DEFINED

- “Any methodological measurement applied to text (or other symbolic materials) for social science purposes” (Shapiro & Markoff, 1997, p. 14)
- A class of methods at the intersection of the qualitative and quantitative traditions
- Content analysis is to words (and other unstructured data) as statistical analysis is to numbers.

COMMON TYPES OF CONTENT ANALYSIS

Qualitative Content Analyses

- grounded theorizing (Glaser, 2002)
- narrative analysis (Riessman, 1993)
- discourse analysis (Brown & Yule, 1983)
- rhetorical analysis (Selzer, 2003)
- conversation analysis (Hutchby & Wooffitt, 2008; Sudnow, 1972)

Quantitative Content Analyses

- dictionary-based approaches (Short & Palmer, 2008)
 - bag-of-words
 - computational content analysis
- topic modeling (Hannigan, et al., 2019)
- natural language processing (Harrison, Thurgood, Boivie, & Pfarrer, 2020)
